- 4. Follow the curing instructions for the product used.
- 5. After using the lamp, disconnect it from the mains.

## Warnings:

- The lamp should be powered only from the 5V USB socket! You can connect it to a computer, power bank or charger with USB port (5V, 1A-2A).
- Protect the device from contact with dust, water and other liquids.
- Disconnect the lamp from the power source when the lamp is not in use or when it is needed cleaning. Do not use the lamp:
- In damp rooms.
- If the AC adapter has been damaged.
- If the device or the connecting cable is damaged.
- If the timer buttons do not work.
- The machine should not be left running longer than 60 minutes as this can reduce it its service life. The device is intended for indoor use.
- It is forbidden to make independent switching and changes to the device.
- Opening the camera is strictly forbidden and tantamount to voiding the warranty, and the manufacturer is not responsible for the correct and safe operation of the device.
- Do not look directly at the UV light, which may damage the eyes. Lamp uses UV / LED diodes which emit dangerous UV rays. They can also cause skin damage. The skin may be more sensitive to UV rays while taking medications or using cosmetics. If you notice any sudden changes in your skin, see your doctor immediately.
- KEEP AWAY FROM CHILDREN.
